AI Data Apprenticeship Programme (AIDP)

AI Singapore

Job Description

AIDP is a new 6-month, full time on-the-job training programme in data curation for AI solutions.
It comprises 2 months of coursework on data curation and basic data engineering techniques and 4 months of hands-on training on a real industry project.

The duration will be a total of 24 weeks: 8 weeks of deep skilling and 16 weeks of practicum.
Apprentices will learn to use selected tools as well as develop their own Python Scripts to carry out key tasks in Machine Learning (ML) projects.

Apprentices will also receive a stipend of SGD1500 (no CPF) which is taxable.
